

Letter to send in the Event Microcells are installed near you

Attention Mayor and Council: Questions about name telecom company Microcell sites in where you live

Dear Mayor \_\_\_\_\_ & where you live Council,

We are writing to express our strong concern over the new name telecom company microcell sites appearing on neighbourhood power poles throughout where you live.

One such microcell site is installed on the hydro pole at Actual address of microcell near our property, very close to our name rooms of house ie: master bedroom. We have measured the distance from this pole to the middle of our bed and found it to be within number required meters! We have a line-of-site view of the pole and transmitter from our bed. How can this be safe?

We are concerned about the Radio Frequency (RF) radiation that we will be subjected to on a constant basis from these nearby devices. What is the signal strength of these devices? What are the regulations governing the placement of these microcell sites relative to human habitation?

How close is too close? I suspect we are!

Neither the District of where you live nor name telecom company has given us ANY advance notice, information or warning of these installations. When the District and name telecom company

publicly co-announced the establishment of a new fibre optic network with much fanfare, there was NO mention of these new microcell sites as part of the deal. It seems \_\_name telecom company\_\_ and/or the name of the local government where you live is trying to sneak these RF- emitting devices into our neighbourhood without any opportunity for input from those affected.

Has \_\_name telecom company\_\_ secured the required permits from the name of the local government where you live for these microcell installations?

Had we been contacted in advance, we would have requested that this particular microcell site be repositioned to state preferred location. This alternate location would provide approximately the same cell coverage, but without the conflicts presented by the one near our bedroom.

We would like the \_\_name of the local government where you live\_\_ to investigate this matter and in the meantime prohibit name telecom company from activating the microcell site that is at \_\_Actual address of microcell\_\_ until such time as our concerns are addressed.

Sincerely,

Name
