Dear Mr. Ruimy:

Re: Radiocommunications Tower at 19675 Meadow Gardens Way, Pitt Meadows, BC

At our regular council meeting held on July 23, 2019, Pitt Meadows City Council passed the following resolution with respect to the above:

"THAT Council forward a letter to the MP, MLA, Health Canada, ISED (Innovation, Science and Economic Development Canada) and Rogers expressing significant concerns raised by Council and the community regarding the long-term health consequences related to cell towers and wireless technology, and implore the federal government to conduct thorough research into this matter."

Pitt Meadows City Council has substantial concerns regarding: the health implications of cell towers in their community; the lack of awareness around potential health risks associated with cell towers; and the lack of communication from, and ongoing research by, the federal government regarding these matters; and the likelihood that Safety Code 6 protocols are significantly out of date. We are also extremely concerned about potentially emerging 5G technology. We urge you to advocate on our behalf for comprehensive research and ongoing public communication and education by Health Canada and other Federal agencies into the health effects of wireless technology.

Yours Truly,

Mayor Bill Dingwall
BGS, LL.B., CPHR

/...2
